

# Extra dispensing power in the palm of your hand.

The innovative HPx™ Series dispensing tools make it easy to apply precise amounts of very thick assembly fluids like silicones, medical-grade adhesives and epoxies through small gauge dispense tips. Workers produce better quality parts in much less time with no hand fatigue.

HPx tools are used with EFD air-powered dispensers, and can also be mounted to the Ultra® TT XYZ Automation Series. They feature a unique design that increases the pressure inside a disposable syringe reservoir up to 7X.

Two models are available:

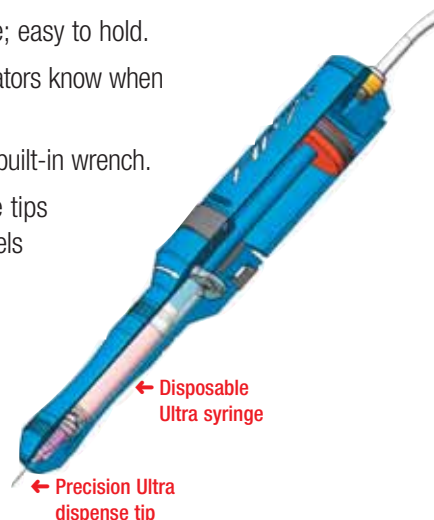

- The HP7x dispensing tool uses a 3cc syringe and produces up to 700 psi (48.2 bar) of dispensing pressure from 100 psi (6.9 bar) of input.
- The HP4x tool uses a larger capacity 10cc syringe and produces up to 400 psi (27.6 bar) of dispensing pressure from 100 psi (6.9 bar) of input.

## Features

- Lightweight aluminum handpiece; easy to hold.
- Low level fluid indicator lets operators know when to replace the syringe barrel.
- Easy tip installation/removal with built-in wrench.
- Uses small gauge Ultra dispense tips and Ultra disposable syringe barrels for convenient fluid management.

## benefits

- Fast, consistent application of very thick fluids.
- Eliminates hand fatigue.
- Improves quality, minimizes rework and rejects.
